

Suitable for
AMB-300XS

Lifting Assembly

SLM-DJ3010-A

Simple Configuration, Anti Off-Center Ability

Effortless Installation, Simple Configuration

Seamlessly integrate with AMB-300XS using just 4 bolts. Quick-connect to the chassis' reserved connectors. Roboshop ensures rapid configuration with unparalleled ease of use.

Customizable Lifting Height

Tailor the lifting height based on the actual scenario. The supported lifting height ranges from 50 mm to 150 mm.

Enhanced Adaptability to Off-Center Loads

In width, the rated load capacity will not change no matter how the center of gravity shifts.
In length, the rated load capacity will decrease by no more than 33% when responding to shifts in the load's center of gravity.

Load Up to 300 kg

Lifting loads ranging from 0 kg to 300 kg, meeting material handling needs in diverse fields such as factory logistics, e-commerce, 3C electronics, and other scenarios.

Basic parameters

| | |
|---------------------|-------------------------------------|
| Product model | SLM-DJ3010-A |
| Product name | Lifting Assembly |
| L x W x H | 820 x 560 x 103.5 mm (customizable) |
| Rated load capacity | 300 kg |
| Lifting height | 60 mm (customizable) |
| Lifting time | ≤6 s |
| Shell material | SPCC |
| Shell color | RAL9003 Signal white (customizable) |
| Nominal weight | 65 kg |

Dimension (mm)
